Memo: ESSER III FSISD Use of Funds August 2021

Fort Stockton ISD, in consultation with community stakeholders, plans to use the American Rescue Plan (ARP) funds known as ESSER III, to continue to employ existing staff by offering retention pay to current employees. A large portion of these funds will be spent on preventing virus transmission through improved air quality in an updated HVAC system at Apache Elementary.

The district will address the needs of students who may have experienced learning loss, due to an interruption in educational services, through supplemental staff providing curriculum support at each campus and district wide. Students identified as needing extra learning time may also be served through summer school and tutorials. Also included are social emotional learning programs including training in this area for staff. These funds will be used from school year 2020 through the end of September 2024.
